SUMMARY

Full Stack and AI Software Engineer with 2+ years of experience building production web applications and AI-powered systems. Builds LLM-based AI agents, automated web scrapers and data pipelines, and REST APIs with FastAPI, Node.js and .NET. Develops responsive frontends in React and Tailwind CSS, designs SQL and NoSQL data models on PostgreSQL, and ships containerized services with Docker. Background in Data Science, with a focus on clean, maintainable code and systems that move from prototype to production.

EXPERIENCE

Software Engineer (Full Stack & AI)

Cloudtek | Islamabad, Pakistan | Feb 2025 - Present

- Built AI agents on large language models (LLMs) that automate multi-step tasks through tool calling, structured outputs and prompt workflows.
- Integrated LLM APIs into production applications, handling prompt design, context management and response validation.
- Engineered web scrapers in Python to extract, clean and structure data from websites for downstream processing and AI use cases.
- Developed backend services and RESTful APIs with FastAPI and Node.js, covering routing, request validation, authentication and error handling.
- Built backend modules with .NET to support application features and service integrations.
- Designed relational schemas and wrote SQL queries in PostgreSQL, and modeled NoSQL data stores for flexible and unstructured data.
- Developed responsive frontend interfaces with React and Tailwind CSS, connecting them to backend APIs for end-to-end features.
- Containerized applications and services with Docker to keep development and deployment environments consistent.
- Managed source code with Git and GitHub using branching, pull requests and code reviews for team collaboration.
- Delivered full stack features from requirements through deployment, working across the database, backend, AI and frontend layers.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C#

AI & LLMs: AI Agents, Large Language Models (LLMs), LLM API Integration, Prompt Engineering, Web Scraping, Data Extraction

Backend: FastAPI, Node.js, .NET, RESTful APIs

Frontend: React, Tailwind CSS, HTML, CSS

Databases: PostgreSQL, SQL, NoSQL

DevOps & Tools: Docker, Git, GitHub

EDUCATION

Bachelor of Science in Data Science

International Islamic University Islamabad | Islamabad, Pakistan | 2025 - 2029 (Expected)
